

Interactive Applications: Website Embedding Options

This page describes the options available for embedding the Interactive Site Map, 3D Walking Tour, 2D Furniture Decorator and Aerial 360 interactive applications into property websites.

NEW: To display your 3D Walking Tours on Apartments.com and Zillow, go [here](#):

- [How to Add Your 3D Walking Tours to Apartments.com](#)
- [How to Add Your 3D Walking Tours to Zillow](#)

Limited to 3D Walking Tours. Not available for other products.

Open with a Standard Link or Button

Interactive applications can be opened directly with a standard HTML link using an image or text. Links can be used both in emails and on web pages. The 3D Walking Tour, 2D Furniture Decorator and Aerial 360 applications automatically open to the first floor plan.

Example 3D Walking Tour: Click [this text link](#) to open.

Example Interactive Site Map: Click [this text link](#) to open.

Embed into Your Web Page

Applications can be embedded into a web page using a standard iframe HTML element.

In the example below, the iframe loads the interactive 3D Walking Tour application from this URL:

<https://3dplans.com/apps/hosting/01234/>

Settings for the iframe element can be seen on the [w3schools.com iframe page](#).

Link Directly to Individual Floor Plans

Each floor plan has a unique link. This can be found by loading the application and selecting a floor plan in the drop down menu. The URL at the top of the browser is the unique floor plan link. Here are example links:

<https://3dplans.com/apps/hosting/01234/?id=1>

<https://3dplans.com/apps/hosting/01234/?id=2>

<https://3dplans.com/apps/hosting/01234/?id=3>

Embed without Header and Menu

Applications can be embedded without the header and menu in 3 easy steps.

1. Get links to the individual floor plans. Follow the instructions above, under **Link Directly to Individual Floor Plans**

Example: <https://3dplans.com/apps/hosting/01234/?id=1>

2. At the end of the link, add: &menu=off

Example: <https://3dplans.com/apps/hosting/01234/?id=1&menu=off>

3. Do this for each floor plan and embed them on your website. The result is seen below.

Embed without Share Button (2D Decorators Only)

2D Decorators can be embedded without the share button in 3 easy steps.

1. Get links to the individual floor plans. Follow the instructions above, under **Link Directly to Individual Floor Plans**

Example: https://3dplans.com/apps/2d-floor-plan-decorator/elan_maison?plan=a1

2. At the end of the link, add: &share=off

Example: https://3dplans.com/apps/2d-floor-plan-decorator/elan_maison?plan=a1&share=off

3. Do this for each floor plan and embed them on your website. The result is seen below (the share button is typically displayed next to the question mark button).
